

Engineered Products Inc.

Quality Engineering Technologist (ASME Pressure Vessel Fabrication)

SLEEGERS Engineered Products Inc. (sleegers.ca) is a London-based supplier of engineered solutions for the propane industry. SLEEGERS has over 50 years of experience providing our tier one customers with outstanding service and exceptional quality. Our teams design and build a variety of engineered products including propane motor fuel tanks, industrial pressure vessels, and propane vending kiosks as well as offer specialized engineering services to the propane industry. With a sustainable market in the energy sector and best-of-class facility – we are here to stay.

We are recruiting a highly motivated, analytical, and detail-oriented quality team member to grow with us at SLEEGERS. In this newly created role, the successful candidate will work with our quality leader to continuously improve and enhance the capability and performance of our operations while also supporting the day-to-day efforts of our quality inspectors.

We are looking for an analytical and technically competent team member who:

- Recently graduated from an applicable engineering technologist or technician program
- Has a base understanding of quality systems
- Has both a practically-minded mechanical aptitude as well as an analytical thought process
- Can demonstrate having a working knowledge of Section VIII of the ASME BPV Code, welding process, and weld quality inspections
- Is able to develop simple and present technical reports, including data analysis

Your core responsibilities would be:

- Support our quality leader in developing and administering the Advanced Product Quality Planning (APQP) aspects of our pressure vessel fabrication and welding operations
- Aid in the development of production standard operating procedures, work instructions, quality inspection methods, root cause analysis investigations, and other process improvements
- Act as the cross-functional link between our production, engineering, and our quality teams
- Interface directly with customers and suppliers on process changes, non-conformances, etc.
- Support our quality inspectors by completing on-product inspections

Our compensation and benefit offering to you:

- Competitive compensation package and endless opportunities for growth and advancement
- Annual performance incentive bonus program
- Comprehensive dental and health benefit plans
- Retirement plan with employee-employer matched contributions
- Extensive training and development programs

Salary for this position is commensurate with experience.

If you are passionate about quality engineering and believe you belong with an organization that values integrity and employee advancement, please forward your resume to recruiting@sleegers.ca.

SLEEGERS is committed to providing a barrier-free environment and promoting independence, dignity, integration, and equality of opportunity of persons with disabilities.
